**Listing of Claims**

1. - 15. (Cancelled)

16. (Currently amended) Snowboard binding according to Claim ~~45~~ 18, wherein the contact surface of the center disk and/or the contact surface on the base plate has a friction or positive connection against rotational movement of the center disk with respect to the base plate.

17. (Currently amended) Snowboard binding according to Claim ~~46~~ 18, wherein the positive connection is formed by a toothing arrangement.

18. (Currently amended) ~~Snowboard binding according to Claim 15, wherein~~  
Snowboard binding with a base plate and a center disk in a circular center opening in a center of the base plate, wherein the center disk rests with a circumferential section oriented towards a snowboard on an edge section of the base plate which expands away from the snowboard at the center opening and the center disk is provided with fastening openings for fastening elements for fixing the center disk and thus the base plate to the snowboard, and with a locking device which is arranged on the edge section of the base plate at the center opening and secures the center disk at the base plate against rotational movement, wherein a contact surface is provided on the base plate and on the circumference of the center disk respectively, the locking device presses the contact surface on the base plate in a vertical direction towards the snowboard against the contact surface on the circumference of the center disk and the contact surface on the circumference of the center disk is provided on a radial projection of the center disk, which is designed as one piece with the center disk, the locking device for pressing together the contact surfaces on the center disk and the base plate comprises comprising a screw which engages in the center disk and in the base plate in an area of the contact surfaces.
